

Please do not allow banks to be able to make additional phone calls to their customers. If anything, banks should be forbidden from making phone calls unless a customer specifically requests that type of communication, in writing, AFTER opening and establishing an account to avoid being forced to agree to the possibility of unsolicited calls during the application process. Mail correspondence is sufficient for banks to use. Please use your power to protect phone customers' privacy and peace of mind. Unsolicited phone calls of any type need to be stopped.
